SEND FOR PROSPECTUS.

The days of "Wild Cat" mining and the floating of "Wild Cat Companies" have passed. The public generally is too well posted, and it is a settled and recognized fact that gold mining has become and is now, when properly carried on, with the same care and attention given to other affairs, a strictly legitimate and highly profitable business. Knowing the value of your ore, knowing that your supply is inexhaustible, you proceed to extract from that ore a product that is *the financial foundation of the world, the demand for which never fails; the market is never overstocked, the price never fluctuates; wars, elections, stagnation of business, or even panics, have no effect on gold mining. The Government Treasury is your market place and the whole world your ready customer.* The fact is, everybody admires a miner's wealth. It is clean. There are no blood or tears on it. It is acquired away from the scheming and cut-throat competition that characterizes ordinary ventures, where the success of one man so often means the disaster and downfall of some other man, or perhaps, a number of men. Nobody has been pinched; nobody has been wronged. The miner who digs a fortune out of the ground has the satisfaction that he hasn't robbed a soul, even though he becomes a hundred times a millionaire. "As I look at the matter there are few producers of wealth. The many live on the few. The only man comparable with the miner is the farmer. He gets what he has direct from nature, but he produces perishable wealth. While he meets a want, his contribution to the world's wealth, therefore, is not a permanent one like the miner's. The gold miner is to-day the king wealth producer of the country, and I honor him above all others. It is no dishonor; it needs no apology to emulate his example or assist him in his efforts. There is the whole question in a nutshell."

The Scharf Tag Label & Box Co.

HAVE many facilities not possessed by the ordinary printing establishment, even of the modern and progressive type.

They offer the inducement of quick and up-to-date work and the naming of as low a figure as can be put upon a first-class product.

Their customers appreciate the marked advantage of their being able to attend to all the operations attendant upon difficult and out-of-the-common printing—pen and ink designs, wash drawings, engravings, die cutting, embossing, round cornering—all, in fact, of modern machinery and mechanics are represented within the one establishment.

They are always glad to submit designs and estimates on anything contemplated in their line.

They solicit your patronage.
